

New Product Announcement

Hibi Universal Bathing System 5ct Pack

Dear Valued Distributor:

June 17, 2024

Mölnlycke Health Care, manufacturer of HibiClens® Antiseptic Skin Cleanser, is pleased to introduce a new line extension to our Hibi Universal Bathing System (HUBS)! Our new 5-count pack provides your hospital customers with a new option to meet specific patient bathing needs.

The Hibi Universal Bathing System 5-pack offers:

Flexibility

- Our traditional HUBS pack included 10 dry, disposable washcloths in packaging that acts as a single-use basin. Our new 5 count pack provides for smaller patient populations, such as pediatrics, and additional uses where 10 cloths are not needed.

Improved sustainability

- With half as many cloths as our traditional packaging, the new product avoids waste where fewer cloths are needed to support patient hygiene best practice.

An affordable entry point

- Hospitals work hard to run sustainable businesses; our new line extension provides a lower price point than the 10-count pack to begin implementing bathing best practice.

All the benefits you expect from HUBS

- Eliminate the infection risk associated with reusable basins, reduce reliance on laundered wash cloths, and experience the benefits of the nurse-aided bath. Our bathing system was designed to meet the in-use needs of nurses and the high demands of modern Infection Prevention practices.

Please contact your local representative or call the Mölnlycke Customer Service Center at 1-800-843-8497 for more information. Thank you for your support and we look forward to continuing to help meet your infection prevention and patient hygiene needs.

Regards,

Jason Liles
