

Hibi®

NEW 5-Pack Universal Bathing System

INTRODUCING

Soft, Durable, 5 dry, Disposable
Washcloths in a Single-Use Basin

- **NEW version** to provide with the many benefits of a water-based bath in smaller patient populations while maintaining optimal infection prevention practices
- Promotes standardization by reducing the need for linens and bath wipes while also eliminating reusable basins
- Reduces risk of cross-contamination that comes with reusable basins

“

We continue to use our HUBS System with the Hibiclens. It is comforting for our Nursing Staff to provide our patients with something as basic as a real bath. That's what this HUBS System provides... that warm water, soft cloths, that touch and feeling of care from their Nurse Provider. Now more than ever it's the simple things like a bath that means the most, showing we are not afraid to touch our patients, and provide care for those in our care.

- Paulina Rodriguez BSN RN,
Infection Preventionist

HUBS

Standardizing the bath while reducing cross-contamination

HUBS helps provide the wash-lather-rinse component that is recommended by the CDC for the removal of spores.* This process improves outcomes over standard bath wipes by rinsing away harmful bacteria that can spread rapidly through a unit's population.

HUBS can be used by all staff members to streamline the bathing product selection process throughout the facility. This standardization of bathing products can eliminate complicated, unit by unit training and allow for easy floating staff integration.

Simply add water and utilize the appropriate soap according to facility protocol.

Instructions for Use:

1. Peel back label and stick to the package.

2. Add 16-20 ounces of water.

3. Reclose and massage pack.

4. Bathe, rinse and place used cloths back into package. Reseal for disposal in trash.

HUBS 5-Pack

The **NEW** Hibi® Universal Bathing System provides:

- Smaller size adding flexibility in usability, affordability, while promoting sustainability

Key Drivers:

- High demand in Pediatrics requires a smaller HUBS version to avoid waste
- Growth in other patient populations that use fewer cloths (pre-op holding areas, post-op CHG cleansing, etc)
- Additional uses for spot cleansing, smaller patients, ambulatory surgical centers, etc

HUBS: The Better Way to Bathe

The Hibi® Universal Bathing System provides:

- Greater control over the bathing process
- A convenient method for giving a therapeutic bath
- Durable, yet gentle, disposable wash cloths
- A superior alternative to basins
- One HUBS + Hibiclens = 3 packs of impregnated CHG wipes

Purchasing Information:

Average number of impregnated CHG packs used per bath

Code	Description	Units/Case
59911	Hibi® Universal Bathing System (contain 10 washcloths)	48
57541	Hibiclens® 4oz. bottle (with foam dispenser)	24
59915	Hibi® 5-Pack Universal Bathing System (contain 5 washcloths)	128 pc/cs

*Products sold separately
