

FUEL SURCHARGE POLICY 2022

CONCORDANCE[®]
HEALTHCARE SOLUTIONS

Objective

Concordance has implemented a fuel surcharge for all shipments due to the constant fluctuation in diesel fuel prices. The surcharge calculation index is based on prevailing prices for diesel fuel in regions that Concordance operates. Implementing this industry standard surcharge policy will allow us to respond to fuel price changes in a timely manner. Concordance will work with your team to determine the best mechanism of how to incorporate these charges on a monthly basis. We do not want to cause any AP match exceptions for your invoices and there are options available to ensure this surcharge can be implemented with you in mind.

Concordance will adjust the surcharge on a monthly basis, based on the average fuel price posted by the U.S. Department of Energy via the web at: <https://gasprices.aaa.com>

National Average	Fuel Surcharge	Not to Exceed
\$4.00 to \$4.10 per gallon	0.60%	\$27.00
