CAUTIONS: Federal (USA) law restricts the sale of this device on or by the order of a physician. Available by prescription only. Please see instructions for use and care. For single patient use.

Indication for Use: The anti-static Compact Space Chamber is intended to be used by patients who are under the care or treatment of a licensed health care provider or physician. The device is intended to be used by these patients to administer aerosolized medication from most pressurized Metered Dose Inhalers, prescribed by a physician or health care professional. The device is intended for use in neonates, infants, children, adolescents and adults. The intended environments for use include home, hospitals and clinics.

¹McIvor RA, Devlin HM, Kaplan A. Optimizing the Delivery of Inhaled Medication for Respiratory Patients: The Role of Valved Holding Chambers. Can Resp J. 2018; 5076259 ²Levy ML, Hardwell A, McKnight E, Holmes J. Asthma patients' inability to use a pressurized metered-dose inhaler (pMDI) correctly correlates with poor asthma control as defined by the global initiative for asthma (GINA) strategy: a retrospective analysis.
