

We are excited to announce the expansion of the Kate Farms® pediatric portfolio with **four** new products: **Pediatric Peptide 1.0 in Strawberry** and **Kids Nutrition in Vanilla, Chocolate, and Strawberry** flavors.

At Kate Farms, our mission is to make nutrition the foundation of human well-being. Our innovative, plant-based, organic products are designed to provide high-quality nutrition and are made without common allergens or artificial sweeteners, flavors, colors, or preservatives — making them suitable for a wide range of patients.

Our pediatric portfolio is designed to help support children's growth and development and is eligible for insurance coverage. The new Pediatric Peptide 1.0 in Strawberry is one of our most requested products, offering another great-tasting peptide formula for tube feeding and oral use. Kids Nutrition is available in three delicious flavors for oral nutrition supplementers, may also be used for tube feeding, and contains DHA from a plant-based source.
