## Product Supply Update

Dear Valued B. Braun Customer,

We want to provide an update on how B. Braun is managing IV solutions supply to ensure providers can continue to maintain proper patient care.

We remain focused on normalizing product supply, and we continue to make meaningful progress in our inventory recovery efforts. As a result, beginning with July allocations, we will be increasing allocation levels to 120% on an additional 29 IV Solution, Irrigation, and Clinical nutrition product codes. Additionally, allocation has been completely removed for catalog L8061, allowing for broader access across the marketplace. This expansion builds on the progress we made in May and reflects the continued strength of our supply chain and manufacturing capabilities. Products not listed in the updated table will remain at 100% allocation levels.

| Product Code | Product Description             | NDC          | Current Allocation Level | 7/1 Allocation Level |
|--------------|---------------------------------|--------------|--------------------------|----------------------|

This allocation increase reflects our ongoing investment in production capacity, workforce expansion and raw material availability. These efforts, along with stabilizing market conditions, position us to better serve your clinical needs. Please allow a brief period (typically 1–2 weeks) for our distribution partners to adjust their systems and inventory flow.

We value your partnership and remain committed to providing transparent, proactive updates as the supply environment evolves. If you have questions or need additional support, please reach out to your B. Braun sales representative or contact our Customer Service team at 1-800-227-2862.

Sincerely,

*Jerry Ditty*
