RE: Follow up on 0.2µm filter supply shortage

Dear Valued Customer,

As mentioned in our prior customer communication (BD-152114) on June 23, 2025, we continue to face a supplier-related shortage of large volume 0.2µm filters, which is impacting BD Alaris™ Pump Sets and BD Gravity and Extension Sets (see Appendix 1 for list of affected products). While we are doing our utmost to continue supplying large volume 0.2µm filter tubing, we are unable to meet full allocation needs at this time. Based on projection of incoming raw material, BD expects to produce the affected 0.2µm BD Alaris™ Pump Sets at roughly 90% of historical volume and the affected 0.2µm BD Gravity and Extension Sets at roughly 60% of historical volume. To manage this situation effectively and help meet all customers' demand, BD has taken the following actions:

- Prioritized production of specific product catalog numbers based on vendor allocations to maximize production output; thus, some product catalog numbers will not be available in the short term and open orders for temporarily postponed products will be cancelled. (see Appendix 2).
- Implemented allocation reviews to manage direct orders and prevent stockpiling.
- In order to correctly prioritize current demand, we will also cancel any direct orders on products that have aged more than 30 days on all products in this notification. If you have an order that is cancelled as a result, we ask that you evaluate your inventory position and re-submit an order only for the amount of product needed to continue care vs order to stock.

For further information:

Please contact your local BD sales associate or BD Customer Care at 1-844-823-5433 or visit www.bd.com/en-us/support. Thank you for your continued patronage and support.
