New Product Announcement Actimove® Manus Air

Dear Valued Customers,

We are pleased to announce an exciting update to our Actimove® line! Actimove® Manus Air, the first ready-to-wear stabilizing fracture wrist brace on the market, is **launching September 1, 2025**.

Features:

- Featuring a ready-to-wear and customizable aluminum splint that stabilizes the wrist in a functional position
- Manus Air is intended for the treatment of painful conditions and irritations of the wrist joint associated with chronic or acute disorders
- Allows for visibility of common incision sights without remove the brace
- Allows patients to monitor wound at home for signs of fracture-related infection (FRI)
- Maximum wearing comfort thanks to an open and low profile design coupled with water-resistant and food-grade materials means the user can wear the brace when they need stabilization the most
- Early detection and improved monitoring of infections
- Possible for topical antibiotic application while wearing the brace
