

RE: Discontinuation Announcement - MEDRAD® CTP-200-FLS Syringe Kits

April 1, 2025

Dear Valued Bayer Partner,

Bayer Healthcare, LLC

Bayer remains steadfast in our commitment to advancing patient care through performance, reliability, innovation, and exceptional service. This letter serves as the end-of-life notification for the MEDRAD® CTP-200 FLS syringe kits.

1 Bayer Drive
Indianola, PA 15051

www.radiologysolutions.bayer.com

Bayer plans to continue to accept orders for the MEDRAD® CTP-200 FLS syringe kits up **until December 29th, 2025**, with the **final ship date of December 31st, 2025**, unless inventory is not available.

Bayer is committed to your success, and we are here to support your transition from a legacy injector product to the MEDRAD® Stellant FLEX CT Injection System, a fully connected solution that integrates hardware, software and services to deliver enhanced value to your suite. Fully connected solutions like MEDRAD® Stellant FLEX are scalable, personalized, resilient, and secure, which helps you to focus on what matters most: patient care. Flexible upgrade pathways are available for discussion with your Bayer Sales Representative, who is ready to explore replacement solutions and discuss how the performance, capability, and reliability of the MEDRAD® Stellant FLEX, can improve your workflow. Together, we will ensure a seamless transition to meet the evolving needs to power patient care.

Please contact your Bayer Channel Management Representative, or appropriate Bayer Customer Support Representative at 1-800-633-7231 (Option 2), or visit www.radiologysolutions.bayer.com if you have questions regarding the discontinuation of this syringe product or the availability of the MEDRAD® Stellant FLEX CT Injection System.

Sincerely,

A handwritten signature in red ink that reads "Jill R. Carbone".
