Subject: Global End of Sale Notice – Electrode Portfolio

Dear Valued Customer:

At Cardinal Health™, we are continuously working to optimize our product offering by creating scale in the right places and investing in the areas that matter to you. Our Portfolio and Product Management process utilizes extensive customer research, coupled with your need for differentiated, innovative, sustainable, and quality products, to determine the products in our portfolio. This has provided insight into areas where we can streamline our offering while leveraging our expertise in distribution to offer a complete solution of products.

As a part of this work, **we plan to discontinue our 222002A- Kendall™ Prewired Reflective Mylar Backing Neonatal Electrode with Aloe in October of 2024, with inventory expected to be depleted by November of 2024.**

Please see Table 1 for a recommended Cardinal Health brand alternative product. Moving forward, please utilize the alternative offerings listed below:

Table 1

Discontinued Product			Alternative Offering		
Product Code	Description	Electrodes per Pack/Case	Product Code	Description	Electrodes per Pack/Case
222002A-	Kendall™ Prewired Reflective Mylar Backing Electrode with Aloe, 0.060IN Socket, Radiolucent, 3 Pack, Square 1" X 1.25", Neonatal	3/PK 300/CS	31424785	Kendall™ Puppy dog Prewired Clear Tape Electrode with 0.060IN Socket, Radiolucent, 3 Pack, Square 1" X 1.25", Neonatal	3/PK 300/CS

31424785 shares similarities with 222002A-, but there are a few key differences. Firstly, 31424785 features a tape backing, while 222002A- has a reflective mylar backing. Secondly, 31424785 utilizes our standard hydrogel adhesive, whereas 222002A- incorporates aloe in the adhesive.

Please contact your local Cardinal Health™ Sales Representative or Cardinal Health Customer Service at 800-964-5227 with any questions. Visit the Cardinal Health™ [Electrocardiography website](#) for additional product information.

Thank you for your continued business.
