

New Packaging Updates

Dear Valued Customer,

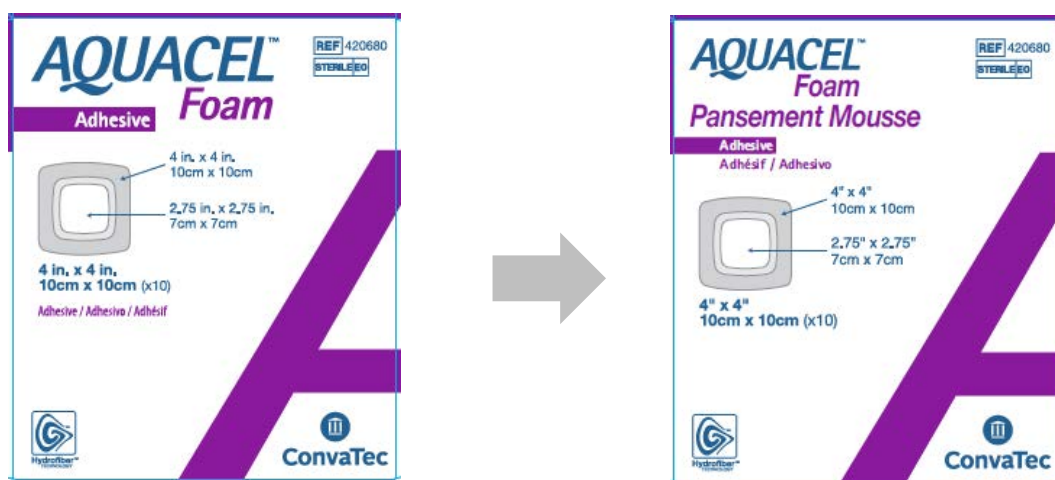

At Convatec, we believe in better healthcare, not just for some but for all. We are introducing our new patient centric packaging format, which aims to bring better understanding of contents and clear dressing type identification on product lines available in the US and Canada.

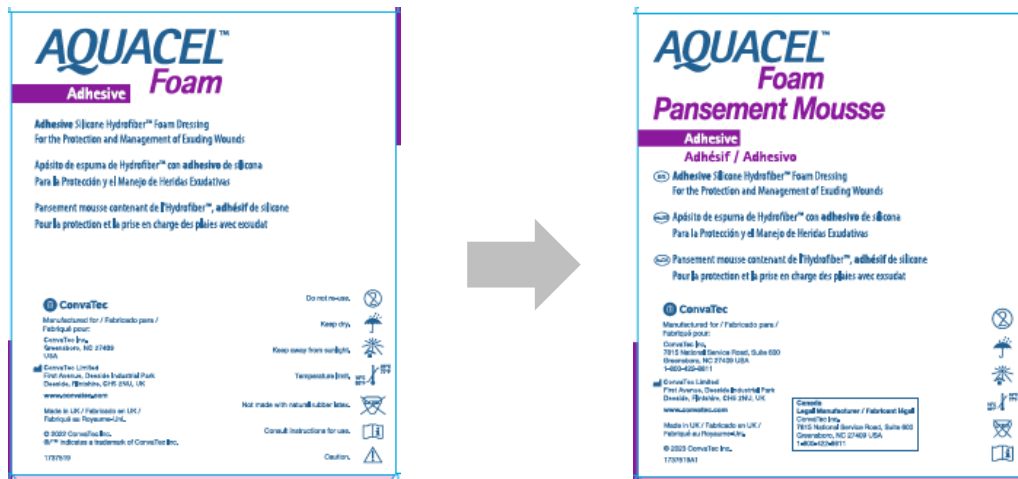

To make this transition into the new packaging straightforward, **no product codes will change.**

Over the next several months packing will be changing for the following product lines:

- DuoDerm® Extra Thin
- DuoDerm® CGF®
- DuoDerm Signal®
- DuoDerm® Hydroactive® Sterile Gel
- AQUACEL® Ag Foam
- AQUACEL® Foam
- AQUACEL® Foam Pro
- FoamLite™ Convatec
- AQUACEL® Extra™
- Carboflex®
- Kaltostat®
- Avelle™
- ConvaMax™

Below are examples of what the cartons will change from/to:

This is just one way we are trying to improve the standard of care and lives we touch, for today, tomorrow and forever.

If you have any questions, please contact your Convatec channel partner. Your representative can help answer any questions during these changes.

Thank you for your continued partnership.

Sincerely,
Convatec
