

Cardinal Health
Medical Products
7000 Cardinal Place
Dublin, OH 43017

April 30, 2025

cardinalhealth.com

Valued Distributor:

As you are aware, Cardinal Health has provided notification of price increases based on global trade tariffs enacted and implemented in 2024, and so far in 2025. Pursuant to Section 7.M.iii of the CPG Policies & Procedures, Cardinal Health will issue an invoice for the increased value of your on-hand and in-transit inventory, reflected as of the effective date of the price change. The invoice for the increased value of inventory will not be eligible for a favorable prompt payment discount.

Following the price change effective date, you will receive an inventory revaluation report from Cardinal Health, detailing the calculated quantity of on hand and in-transit inventory (in transit from Cardinal Health to your warehouse) impacted by the price change. Within 10 business days of receiving this report, you may provide Cardinal Health with a self-calculated report inventory on hand and in-transit. If a self-calculated report is not received, Cardinal Health shall proceed with the calculated inventory revaluation. All reports shall be submitted via email to your sales rep or account manager.

If you have any further questions, please reach out to your sales rep or account manager.

We appreciate your collaboration as we weather these dynamic industry challenges together.

Sincerely,

Jonathan Collins
