

June 2025

Dear Valued Customer:

As a global leader in protection solutions, Ansell is committed to continual innovation, and to ensuring our surgical gloves are engineered to respond to the evolving needs of the healthcare community. Accordingly, we are pleased to announce the launch of the **GAMMEX® PI Hybrid Micro – a uniquely formulated polymer blend of polyisoprene and neoprene that delivers the best of both materials: exceptional comfort and superior durability.**

Featuring Ansell's proprietary HYBRID™ Technology, GAMMEX® PI Hybrid Micro marks the latest addition to the PI Hybrid family of surgical gloves – one of Ansell's fastest growing glove styles globally. This new and unique style is designed to provide surgeons with enhanced tactile sensitivity and dexterity, making it ideal for precision procedures such as ophthalmology, micro, and cardiovascular surgeries. The new GAMMEX PI Hybrid Micro also provides a great solution in catheterization labs, for ENT's, and other specialty areas where delicate touch is desired. Some key attributes of the gloves include:

- **Micro Thickness** - Thinnest yet robust PI glove in the market to allows for increased comfort and sensitivity combined with excellent durability.
- **Hybrid™ Technology** - Polyisoprene and neoprene blend formulation offers latex-like comfort combined with excellent durability.
- **Latex-Free** - eliminates Type I Latex allergies while reducing Type IV Chemical allergy risk and sensitivities via a ZMBT, DPG and CPC free PI formulation.
- Features our proprietary **DERMASHIELD™ Polymer Coating Technology**, providing effortless dry and damp hand donning.
