

THE GENTLE TOUCH

VACUETTE® EVOPROTECT SAFETY Blood Collection Set

Hello!

At Greiner Bio-One, we believe that every needlestick is one too many. That's why we've taken care to design our [VACUETTE® EVOPROTECT SAFETY Blood Collection Set](#) for maximum safety and patient comfort.

If your facility values patient and staff safety, EVOPROTECT may be a great fit. Benefits include:

- Semi-automatic safety mechanism designed for one-handed, in-vein activation.
- Safety trigger location – on the side of the device – minimizes the risk of the needle moving in the patient's vein during activation.
- Audible "click" confirms the safety mechanism is successfully activated.
- Versatility – EVOPROTECT may be used for drawing blood and short-term infusion, reducing the need for additional venipuncture

Curious how EVOPROTECT can benefit your patients and staff? Click below to request a virtual product demo!
