

ADA Scale Consultation

Make the Right Accessibility Decision the First Time

Selecting the right ADA Compliant scale requires more than meeting platform size requirements. Facility layout, patient mobility needs, accessibility clearances, and workflow all play a role.

Our **ADA Scale Consultation** helps healthcare facilities confidently choose the right solution while avoiding costly compliance mistakes.

What Your ADA Scale Consultation Includes

Facility Needs Assessment

Evaluate patient populations, mobility requirements, & weighing workflows.

Space & Layout Planning

Review available space, clearances, and traffic flow to determine optimal placement.

Mobility & Accessibility Review

Identify the best scale solution for wheelchair users, bariatric patients, and ambulatory patients.

ADA Compliance Guidance

Expert insight into ADA requirements and accessibility considerations.

Product Recommendation

Guidance to select the most appropriate certified medical scale for your facility.

Installation & Post-Sale Support

Support from planning through installation and beyond.

Why Healthcare Facilities Trust Health o meter[®] Professional

- ✓ Certified, trusted medical scales
- ✓ Expertise in ADA requirements and accessibility planning
- ✓ Guidance to recommend the right scale the first time
- ✓ Installation and post-sale support
- ✓ Long-term partnership and ongoing support

ADA Compliance Matters

Installing the wrong scale can lead to:

- Workflow disruptions
- Patient safety concerns
- ADA compliance risks
- Costly replacements and returns

An ADA consultation helps ensure your facility installs a solution that supports accessibility, safety, and operational efficiency.
