

AnchorFast™ Oral Endotracheal Tube Product Updates

September 2024

Dear Valued Customer:

We would like to inform you of three product updates to the AnchorFast™ Oral Endotracheal Tube Fastener. This change affects all AnchorFast product lines including: AnchorFast, AnchorFast SlimFit, AnchorFast Guard and AnchorFast Guard Select.

1. The first update includes a change to the primary packaging of the device, where we have moved to an individual 'polybag' style for easier, more efficient in-hospital storage and a significant reduction in plastic waste. This will result in changes to the packaging dimensions and weights, at a Case level, with more specifics below.
2. The second product update includes a new upper lip stabilizer design, with increased surface area and shaped to minimize pressure concentrations.
3. The third and final update is a reduction of the skin barrier pad thickness, designed for flexibility and to reduce material waste.

It is important to note that the product updates will not impact usability of the product but since the product packaging is changing, **there will be dimensional changes to both case and palletization. New case and pallet dimensions are outlined in Table 1 below.**

These product updates will occur automatically, there is nothing you need to do. We anticipate that you will start to receive the updates product in the next 30-60 days. A product change notification will be placed in each individual product for a 6-month period.

AnchorFast™ Oral Endotracheal Tube Product SKUs Impacted:

Stock Number	Product Name	Qty/ Box	NEW Box Size LxWxH (in.)	NEW Box Weight (g)	Pallet Dimension LxWxH (in.)	NEW Pallet Weight	Number of Boxes/ Pallet
