Reference: TranStar™ Pressure Transducers Discontinuation

Dear Valued ICU Medical Customer,

Thank you for choosing ICU Medical products to serve your patients. This letter is to inform you that effective December 31, 2024, the following products will be discontinued.

This letter is to inform you about a transition in our product offering. In an effort to streamline our product portfolio and enhance overall customer experience, ICU Medical will be consolidating our transducer line. As part of this consolidation effort, we will be sunsetting the TranStar product line, fulfilling orders for as long as inventory is available. The Transpac product line will then become the primary solution for your blood pressure monitoring needs. End-users can work with their field representative to assist with a transition plan to the Transpac line.

The following codes will be discontinued:

Item Number	Item Description

With healthy safety stock levels and reliable manufacturing lines, Transpac offers a large variety of configuration options to accommodate clinical applications and operational preferences.

Thank you for your continued support and partnership. We are committed to ensuring a smooth transition and minimizing any disruption to your operation; please reach out to your field representative who can assist with a transition plan to the Transpac line. Additionally, our Customer Service department can be reached at 800-258-5361.

Sincerely,

Lisa DeGroen
