

June 15, 2024

Dear Valued Customer,

As a member of the Global Enteral Device Supplier Association (GEDSA), Moog fully supports the phasing out of legacy enteral feeding products and the transition to ENFit® connectors. All current Moog products are ENFit-only compatible.

During the transition, and in order to support patients with non-ENFit feeding tubes, Moog has sold separately packaged *ENFit Transitional Connectors (F00071)*. These transitional connectors were planned to be available for a limited time only. **In accordance with that plan, the ENFit transitional connectors (F00071) will available for sale through September 15, 2024 or until inventory is sold out, whichever comes first.**

Moog is committed to the safety of our customers and patients. We believe the use of ENFit products will contribute to improved patient safety.

If you have any questions regarding the ENFit initiative or completion of this transition, please contact your local Moog sales representative, customer service at (800) 970-2337, or email us at clinicalsupport@moog.com.

Sincerely,

A handwritten signature in black ink, appearing to read "John Yrungaray".

John Yrungaray
