To Whom It May Concern,

As part of our ongoing commitment to delivering the highest quality, safest, and most environmentally responsible products, we've recently completed a series of detergent reformulations. This initiative focused on using safer, more sustainable ingredients—without compromising on performance.

As a result of these improvements:

- **Prop 65 warnings will be removed** from our packaging labels.
- **Most products will now carry reduced GHS hazard classifications**, reflecting the safer nature of our new formulations.
- **You may notice slight changes in color and scent** due to the updated formulations. These differences are normal and result from our shift to more natural and eco-friendly ingredients.
- Each reformulated product has been tested and certified to **ASTM D7225** across automatic washers, ultrasonic cleaners, and manual cleaning applications. In all cases, the updated formulas have shown **enhanced cleaning efficacy** compared to their predecessors. Additionally, test and certified to **ASTM 8179 standards**.

We greatly value your partnership and remain dedicated to maintaining the highest standards in everything we offer. Thank you for your continued trust and support.

DESCRIPTION	MEDLINE ITEM NUMBERS
SINGLE ENZYMATIC	MDS88000B91, MDS88B9105, MDS88B9115
DUAL ENZYMATIC	MDS88000B9, MDS8800B95, MDS8800B15
MULTI ENZYMATIC	MDS88128ME, MDS8805ME, MDS8815ME
FOAM PRESOAK SPRAY	MDS8800FOAM
