

Medline Oxygen Mask Item Conversion & Discontinuation

Valued Customer,

As part of our ongoing commitment to product quality and portfolio optimization, Medline is initiating the discontinuation of our legacy Medline oxygen mask line. This change supports our goal of delivering clinically superior and patient-preferred solutions across the respiratory care continuum.

Effective mid-Q3 2025, we will begin transitioning from the legacy Medline Oxygen Masks to the Medline Hudson RCI Oxygen Mask portfolio. The Medline Hudson RCI line is recognized for maximizing clinical performance and patient comfort, featuring soft, clear vinyl materials that improve visibility and reduce skin irritation while remaining a cost-effective option for our customers.

What this means for you:

- The legacy Medline oxygen masks will be phased out over the coming months and will transition to the Medline Hudson RCI Equivalent.
- See the product conversion chart below for the list of Medline Hudson RCI items that will serve as direct replacements for the discontinued legacy Medline codes, ensuring a smooth and uninterrupted transition
 - Comparable product crosses are listed below for items that are being discontinued without a direct substitute available.

Timeline:

- Transition begins: Mid-Q3 2025
- Conversion completion: End of 2025

Medline Legacy O2 Masks			Medline Hudson RCI O2 Masks		
Discontinued Item #	Description	UOM	Conversion Item #	Description	UOM
