Subject: Inventory Status

At Nestlé Health Science, we know and appreciate that you put your trust in us to provide high quality products. Our mission is to empower healthier lives. The availability of our products is a key tenet of that mission and is always our top priority.

Due to increased demand associated with formula shortages and supply chain challenges in the enteral space, we regret to inform you that we may be in intermittent supply or potentially out of stock on the products listed below.

Every effort is being made to produce and release more product as quickly as possible. Our internal teams are proactively working to minimize any disruptions and provide as much advance notice as possible regarding future product availability.

Please work with the patients' healthcare providers to determine the best alternative product and transition plan. For additional product information visit the Nestlé Medical Hub at www.nestlemedicalhub.com.

If you order through a Distributor

- Please contact your distributor to understand current inventory levels of impacted products.
- Please proactively communicate your anticipated substitute product choice and case usage to your distributor. Ask that additional volume be brought in to service the need short-term.
- Intermittent, as indicated on the "Estimated Recovery Date" or "Improved Availability" date, could result in orders being cut or limited supply through your preferred distributor.

If you are a Distributor and/or order Direct from Nestlé

- Please check your order notifications for the most up to date information. You may call Customer Service with any questions at 877-463-7853 or email them at nhncustomerservice@us.nestle.com. Reference the PO number with the backordered line item.
 - The notifications will provide an email confirming order creation, cut & shipping notifications.
- Customer manual POs can be submitted directly to:
 - US: Nestle Solon BSCNHSc Esker Manual POs NestleSolonBSCNHScEskerManualPOs@us.nestle.com

We sincerely apologize for any impact this might have on your patients and business. We are working hard to produce more formula as quickly as possible, and we are committed to keeping you up to date on when more will be available.

Sincerely,

Felicia Belle

Vice President, Head of Sales

LOW INVENTORY & OUT OF STOCKS

LOW INVENTORY, MAY EXPERIENCE REGIONAL CUTS				
Product			Suggested Substitution
