

June 1, 2024

Dear Valued Distributor,

We want to announce the following updates to our product portfolio.

Formulation Update

In our ongoing effort to improve the availability of products by optimizing our ingredient sourcing, we are writing to provide you with an update regarding the protein and fat sources for the tube feeding formulas listed in the table below.

We are changing the protein source by replacing sodium caseinate (milk) and calcium caseinate (milk) with milk protein concentrate (MPC). MPC is a quality protein that provides whey protein in addition to casein. This change maintains nutritional quality and supports growing demand for recognizable ingredients; there are no changes to the total protein levels. The fat source will be adjusted by increasing the existing canola oil and removing medium chain triglyceride (MCT) oil, with no change to total fat levels. The transition to 100% canola oil results in delivery of higher levels of essential fatty acids, including omega-3 alpha-linolenic acid.

These upcoming changes were made with careful consideration of nutritional needs and align with Nestlé's commitment to provide a wide array of high-quality options to support your customers. In addition, we want to assure you that this transition is a proactive step to help avoid future supply challenges and to provide you with a more reliable and efficient product supply. We want to assure you that **the product will continue to deliver the same total level of nutrition as the prior formula**. The total levels of protein, fat, carbohydrates, and vitamins and minerals will not change.

What Is Changing?	What Is NOT Changing?
• Protein ingredient change to MPC • Fat ingredient change to 100% Canola Oil	• Total macronutrient and micronutrient values • Ingredients other than the protein and fat source • Pricing • Product Codes • mLs (volume) per container • Case count and configuration

Impact Peptide® 1.5

We wanted to provide you with an update on the availability of Impact® Peptide 1.5. We are currently facing ingredient supply challenges, which will result in an extended out-of-stock situation. Our current inventory is expected to be depleted in the next few months.

We want to emphasize that we have no plans to discontinue Impact® Peptide 1.5. We understand its importance to many patients and healthcare providers. We anticipate resuming production of Impact® Peptide 1.5 in early 2025.

Product Code	Case UPC/GTIN Code	Description
4390097400	10043900974009	IMPACT® PEPTIDE 1.5, Unflavored 24 x 250 mL carton
4390097371	10043900973712	IMPACT® PEPTIDE 1.5, SpikeRight® PLUS 6 x 1000 mL UltraPak® bags

We've identified a list of alternative products that your customers may consider based on their clinical discretion. We trust their clinical judgment to prioritize the available products for those patients who require them the most.

	4390049322	00043900493220	PEPTAMEN® INTENSE VHP, SpikeRight® PLUS 6 x 1000 mL UltraPak® bags

*In addition, clinicians may want to consider use of Arginaid® via bolus for patients with wounds being provided one of the Peptamen® options. Each packet of Arginaid® provides 4.5 grams of supplemental L-arginine, and the number of boluses will be dependent upon the dietitian's assessment of patient needs. IMPACT® Peptide 1.5 contains 18.7 g of L-arginine per liter for immune system and wound benefit. Approximately half this amount (9 g of daily L-arginine supplementation) has been shown to benefit the nutritional management of pressure injury.

Product Code	Case UPC/GTIN Code	Description
35984000	10043900359844	ARGINAIID®, Cherry 56 x 0.32 oz packets
35983000	10043900359837	ARGINAIID®, Orange 56 x 0.32 oz packets

We deeply appreciate your understanding and continued partnership as we navigate the challenge together.

Diabetisource AC® Update

In our March 1st, 2024, letter, we communicated that we would be updating the Diabetisource® AC label to a) reflect 20% of calories from protein, and b) round the fat and fiber amounts to the nearest whole number. Upon further consideration, we have made the decision only to update the new label to reflect 20% of calories from protein. We will maintain the fat and fiber values consistent with the current label and will not be rounding those values to the nearest whole value.

Should you have any questions or require additional information, please work with your Nestlé Distributor Manager, or call our Consumer Service Center at 1-800-422-2752 that is staffed with Registered Dietitian Nutritionists (RDN). Additional product information and support tools can be found on our Medical Hub at www.nestlemedicalhub.com.

You have our unwavering commitment to providing the highest quality solutions to enhance the health and well-being of those you care for.

Sincerely,

A handwritten signature in dark blue ink that reads "Felicia Belle". The signature is written in a cursive, flowing style.
