\* This crosswalk helps you move from legacy SKUs to our current mask platforms. It points to the closest fit options based on design intent and region. It is not intended to be a one-to-one replacement guide as newer masks often add different materials, frame architectures, or accessories. You may confirm patient fit with the product-specific sizing guide before finalizing a mask or mask system transition.

\*\* The mask contains magnets that may interfere with certain implants or medical devices. Please refer to the User Guide for complete labeling information, including magnet contraindications and warnings. A non-magnetic (NM) variant may be available in regions where magnet contraindications apply.

† The Quattro Air mask portfolio and its cushions remain as an active product; their listing in the crosswalk is solely to guide you to the appropriate AirFit F20 sizing SKU and should not be interpreted as part of this discontinuation plan.
