

# CoaguChek® XS Plus System

A refreshed design with your needs in mind

The refreshed CoaguChek XS Plus system features an **enhanced touchscreen interface** and a **built-in barcode scanner**, enabling healthcare professionals to minimize data entry errors while also providing them with the ability customize their PT/INR testing experience.

## Accurate and flexible PT/INR testing

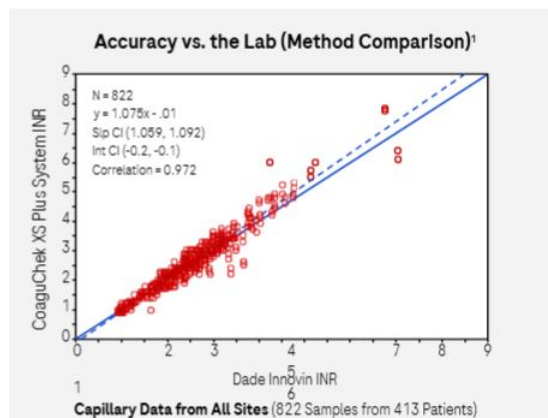

- Accurate precise results in about one minute
- Flexible QC options for any testing environment: onboard controls and optional liquid quality controls
- CoaguChek technology reduces heparin interference up to 0.8 U/mL for more accurate results<sup>1</sup>
- Test results not affected by Hematocrit values between 25-55%<sup>1</sup>

## Easy and convenient to use

- Small sample size (8ul) for easy dosing
- Powered by a rechargeable battery pack
- Icon-driven, color, intuitive touchscreen interface
- Integrated barcode scanning and alphanumeric keyboard for patient IDs, operator IDs, and QC materials

## Streamlined data management

- Stores 2,000 patient test results with comments, date, and time
- Stores up to 60 code keys and 500 optional liquid quality control results with date and time
- Ability to denote patient ID in several fields and add comments after each test results
- Operator and QC lockout capabilities
- New device-specific diagnostic data lists

## The U.S. leader in point-of-care anticoagulation monitoring

Since 1994, Roche Diagnostics has helped healthcare professionals provide quality care to their patients with a PT/INR meter they trust.
