Distributor Letter Discontinuation of the Accutrend® Plus Product Line

Information

We are writing to inform you of an important change regarding one of our longstanding products, the Accutrend Plus instrument. After careful consideration and strategic review, we have decided to phase out the Accutrend Plus product line. This decision is part of our ongoing effort to align our product offerings more closely with the emerging needs of the market and our strategic goals.

Product Name	Catalog Number
Accutrend Plus Meter Kit	05346754160
Accutrend Cholesterol 25/vial	05213312160
Accutrend Cholesterol Control; 2 levels	05219957001

The Accutrend Plus instrument will be phased out in December 2025, and the Cholesterol test strips and controls will be phased out in December 2027.

We can currently offer approximately six months of additional supply for the Accutrend Plus instrument past September 2025. Please note that this timeframe is subject to change (either longer or shorter) if order demand differs from our expectations.

To ensure the continuity of patient care, we recommend that you provide customers the enclosed Customer Letter to ensure they are aware of the upcoming phase out and are able to use the information for future planning.

For many years, the Accutrend Plus has served as a reliable and trusted tool in the monitoring of blood glucose, blood lipids, and lactate levels. The impact of Accutrend Plus on improving patient outcomes and advancing medical diagnostics cannot be overstated. We are profoundly grateful for your support and trust in this product over the years.
