Introducing...

Refreshed CoaguChek® XS Plus system

Roche Diagnostics is pleased to announce the CoaguChek XS Plus system has been refreshed with our customers' needs and workflow efficiencies in mind.

After over a decade on the market, the CoaguChek XS Plus system (catalog number 05021537001) has proven its relevance in coagulation testing at the point of care, thanks to its reliable technology, ease of handling, and connectivity.

With updated features, the refreshed CoaguChek XS Plus system combines the reliability of its predecessor with a new level of usability for optimizing workflows and producing quick and accurate PT/INR results, all while remaining CLIA waived.

NOTE: The current catalog number associated with the CoaguChek XS Plus system will not change with the launch of the refreshed device. Orders for the current catalog number will begin receiving the refreshed meter in mid-February 2026. The refreshed meters will be identified by serial numbers UQ00150000 and higher.

Warranty Replacement

Roche will provide a new, refreshed CoaguChek XS Plus meter for any warranty replacements. Patient care is our priority, and we look forward to providing you with this updated meter to better serve your patients with quality healthcare service.

Connectivity Solutions

The refreshed CoaguChek XS Plus system, starting with serial numbers UQ00150000 and higher, will require an updated version of data management systems to support the new features on the CoaguChek XS Plus system. The refreshed CoaguChek XS Plus system is available with the Roche **navify**® POC Operations middleware digital solution. If you are using alternative data management and connectivity solutions, please contact your vendor to confirm their system's ability to support the refreshed CoaguChek XS Plus system.
