Subject: *TruShot 2.0® No Rinse Sanitizer*

July 1, 2025

Dear Valued Partner

We are pleased to share that we are launching a new addition to our TruShot 2.0® mobile dispensing system. Coming August 2025 is our new ***TruShot 2.0® No Rinse Sanitizer***.

TruShot 2.0® No Rinse Sanitizer is safe on virtually any hard, non-porous surface including **food contact surfaces** and kills up to **99.99% of foodservice bacteria**. With up to **21** in-use quarts in every cartridge, this easy-to-use sanitizer is a great solution for food service facilities, schools, universities, high traffic retail environments, and more. It cleans, sanitizes, and deodorizes in one labor saving step – without the need for rinsing. Paired with a durable trigger sprayer that can be filled at any water source, **TruShot 2.0® No Rinse Sanitizer** is a time-saving tool designed to keep crews moving.

We encourage you to act now to set up this new SKU in your systems. Taking these steps early will help ensure smooth order processing and allow you to promptly meet the needs of our shared customers when purchase orders are submitted.

Together, we can continue to exceed expectations and drive innovation in surface care. Contact your SC Johnson Professional representative today to get started.

Please see linked documents with all the TruShot 2.0® [portfolio set up information](#), inclusive of [pricing](#).

Best,

Wes Klipfel
