PRODUCT SAFETY ASSURANCE

Skin Compatibility Test

Clinical dermatological tests have been conducted to assess the skin compatibility of the product using voluntary test persons in enclosed and repeat application models. These tests, as well as in practical use, have proven that the product has very good skin compatibility.

Product Safety Assessment

The product has been assessed by an independent toxicologist and is declared safe for intended use on hands when used as directed, meeting all relevant regulatory requirements.

Skin Hypoallergenic

The perfume-free and dye-free formulation did not demonstrate a potential for eliciting dermal sensitization after conducting an independent 6 week Human Repeat Insult Patch Test (HRIPT). Allergy sufferers should always refer to the ingredient list before using the product.

COMPATIBILITY TESTS

Glove Compatibility

In independent testing, the use of Alcare® Extra in combination with reputable latex, vinyl and nitrile gloves does not have any deleterious effect on the glove tensile properties using EN 455-2:2009 test methodology.

High Frequency Study

In independent testing, Alcare® Extra was proven to have no untoward adverse effect on the skin condition of the healthy hands of test panellists, even after 48 applications per day for 5 days. Alcare® Extra was found to be significantly more moisturizing compared to the control product - a market leading gel format hand sanitizer. Skin condition was assessed using Trans Epidermal Water Loss (TEWL) measurements, corneometry, visible redness inspection and skin conductance.
