

**Dear Valued Stryker Distributor,**

We would like to inform you that on or around January 15, 2026, Stryker will be reconfiguring the packaging of Stryker's Sage 2% Chlorhexidine Gluconate Cloths, reorder #9705.

To reduce our environmental impact, the new packaging configuration will remove the inner carton. The new packaging will not impact the quantity per case (96 packs/case), product code, solution, cloth, or dosing.

Our local Sales Representatives are working with you to help facilitate the change of this packaging. If you have any questions or require additional information, please reach out to our Customer Excellence team at 800-323-2220 or [smc@stryker.com](mailto:smc@stryker.com).

Respectfully,

**Chip Bartel**

Director, Downstream Marketing

**Sage**
