

February 11th, 2026

Dear Customer,

This communication is a follow-up to communication to the supply disruption originally caused by blue ink residue on the packaging of 3M™ Cavilon™ No Sting Barrier Film wipes and wands. We are happy to announce that that all wipes and wands are now free of the blue-ink residue appearing on the Cavilon™ packaging; no further machine upgrades are expected.

Please refer to the table below for commentary on the supply recovery for our overall skin care solutions portfolio.

	Catalog & Description	Supply status and recovery
3M™ Cavilon™ No Sting Barrier Film	3342 (.75mL wipes)	Not currently backordered. We may hit backorder status early March and recover by ~mid-March
	3342K (.75mL wipes for kits)	Not on backorder, no supply disruptions expected
	3343 (1mL wands)	Currently backordered; we expect continued intermittent shipments until full recovery ~ May 2026
	3343K (1mL wands for kits)	Currently backordered; all orders to ship by late February with full recovery expected ~ early March
	3344 (1mL wipe)	Currently backordered; we expect continued intermittent shipments until full recovery ~ late March or early April 2026 (delayed from February)
	3345 (3mL wands)	Currently backordered; we expect continued intermittent shipments until we reach full supply recovery ~May 2026
	3346 (28mL bottles)	Currently backordered; we expect intermittent shipments until full recovery expected ~May 2026. Solventum in the process of qualifying a new manufacturing line with faster production output; this new will be fully operational by mid-year
3M™ Cavilon™ Advanced Skin Protectant	5051 (0.7 mL wand)	Not currently backordered and no supply disruption expected
	5050 (2.7 mL wand)	Currently backordered; all current orders to ship by end of February with no further supply disruption expected

Weekly alignment meetings are in place with the supplier to review production schedules, address constraints, and mitigate risks. Additionally, we have implemented overtime labor support on Fridays and Saturdays to increase output and stabilize inventory levels.

Sincerely,

Solventum
Medical Surgical Division
