3800 E. Centre Ave., Portage, MI 49002 USA

July 8, 2024

Dear Valued Mistral-Air Customer:

I'm writing to inform you that effective at close of business December 31, 2024, Stryker will no longer represent the Mistral-Air product line as the Distribution Agreement between Stryker and TSC Life will not continue past year end. TSC Life, the manufacturer of the Mistral-Air portfolio, will take over the supply of the products beginning on January 1, 2025. Accordingly, our agreement with you concerning the Mistral-Air product line will terminate on the close of business of December 31, 2024, unless such agreement should expire or terminate prior to that date. A new agreement with TSC Life will need to be executed to facilitate continued supply beginning January 1, 2025. The blowers currently at your facility may remain in place and utilized on a go-forward basis as TSC Life will assume responsibility for your Mistral-Air business on January 1, 2025.

You may reach out to your Stryker sales representative with any questions regarding securing future supply of the Mistral-Air product line after year-end and they would be happy to connect you with a TSC Life representative.

TSC Life is a privately held medical device company based in The Netherlands with sales, marketing and operations teams located in the US. You can contact TSC Life's North American Business Transition Team at: mistralair@tsc-life.com for any questions or inquiries related to the Mistral-Air product family.

Thank you for your business and partnership, we look forward to continuing to serve your organization in other areas for years to come.

Sincerely,

Scott Sagehorn
VP/GM, Acute Care
