

October 2, 2025

Dear Valued Posey Customer,

As part of our mission to provide exceptional service and support, we periodically review our product portfolio and contract offering. Due to the new agreement with TIDI and Vizient starting November 1st, 2025, Novaplus SKUs will be discontinued with a direct substitution to the Posey branded SKU.

The products listed in the table below are now in the process of being discontinued; any remaining stock will be available for purchase until depleted. Direct product cross-references are also listed in the table with the purchase quantity for a full case.

Please note that the pricing for these products will now be at the new unit of measurement. However, for your own distribution efficiency and TIDI's we highly recommend you place orders for eaches in multiples that equal full case quantities – shown in the last column of the table below. This will eliminate waste of TIDI having to break the case and re-package the items making it more difficult for your storage and picking.

We encourage you to make adjustments in your system to the right multiples for a full case to simplify storage. For example, when ordering 8309EL (formerly V8309EL) please set your system to order in multiples of 30 (for example 30, 90, 120, etc.) that will insure we delivery full unopened cases to you.

If you have any questions, please contact your Posey Account Manager or call TIDI Customer Service (1-800-521-1314).

Sincerely,
Phillip Brown

Director
Patient Safety
